

PSALM

# 118 – Part 1 O thank the LORD

D A7 Bm D7 G D A7 D E7

1 O thank the LORD, for he is good; his stead - fast  
2 And let the house of Aar - on say, "His love for -  
3 I cried in an - guish to the LORD; he an - swered

A E7 A D G D

love en - dures al - ways. Now let the house of  
ev - er will en - dure." Let those who fear the  
me and set me free. The LORD is with me;

G Em A D G D A7 D

Is - rael say, "His love will last for end - less days."  
LORD de - clare, "His love will stand for - ev - er sure."  
I'll not fear. What harm can peo - ple do to me?

- |                                                                                                                                                       |                                                                                                                                                         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4 The LORD is with me constantly;<br>he is the one who gives me aid.<br>I'll look in triumph on my foes;<br>I will not need to be afraid.             | 6 The nations all surrounded me;<br>in GOD's great name I made them fall.<br>They hemmed me in on every side;<br>in GOD's great name I slew them all.   |
| 5 It's better far to trust the LORD<br>than look for help to man's defence.<br>It's better far to trust the LORD<br>than in a prince have confidence. | 7 They chased me like a swarm of bees;<br>but like a heap of thorns aflame<br>they very quickly met their end.<br>I slew them in the LORD's great name. |
| 8 I was pushed back and nearly fell;<br>the LORD himself gave help to me.<br>He is my song and source of strength;<br>the LORD gave me the victory.   |                                                                                                                                                         |
